

# 734

## High Speed Fully-Automatic Random Sealer

### Random Case Sealing

The Endoline 734 will automatically adjust its settings to close and seal 0201 cases throughout the case size range in any random sequence. The 734 can operate on small, large, lightweight or heavy cases at speeds of up to 20 cases per minute.

### Four Column Construction

Our unique four column design provides added stability for the taping bridge to ensure the machine runs smoothly at all times with minimal interruption and it provides the support necessary for the floating bridge feature. This fully automatic machine is fitted with two pairs of columns for additional support to the folding section.

### High Speed System

Includes scanning devices to determine the dimensions of the case being presented and automatically adjust head heights and guide widths to suit, thus enabling a throughput of 20 cases/minute.

### Robust Construction

High quality components housed in a robust chassis ensure minimal servicing and enable 24 hour operation. Designed for the rigours of typical end-of-line packaging environments.

### Compact

The Endoline 734 can help increase factory space as multiple lines can feed into one machine. The 734 is well suited to environments where there is insufficient space for multiple sealers or there are regular case size changes.

### Low Cost of Ownership

All Endoline's machines are designed for maximum efficiency and productivity thereby reducing the cost of ownership to a minimum. This case sealer come sat a low capital cost and immediate savings can be seen through reduced labour costs and increased packing speeds.

## 734

Fully Automatic  
Random Case Taper

### Options include:

- Low tape and no tape sensing
- Visual/audible alarm
- Discharge blocked sensing
- Infeed conveyor
- No scan reject conveyor
- Automatic tapehead retract

### Case Dimensions (mm).

	Length	Width	Height (Closed)
Minimum	200	160 or 200	110 or 140 or 170
Maximum	600	460 or 500	510 or 540 or 570

### Note:

- Speeds up to 20 cases per minute subject to case size.
- Machine can be modified for cases outside case size range. Please contact Endline to advise.

### Speed

- 18-20 cases per minute

### Electrical Supply

- Three phase: 380-415V, 50Hz, 6amps per phase

### Pneumatics

- Supply - 22litres per cycle at 5.5 bar

### Machine Finish

- Mild steel, powder coated white (RAL9010) or stainless steel

### Tape Size

- 38mm, 50mm, 75mm
